Forecast for Thursday 17 Aug 2023

Weather: A cloudy day to start with low cloud often shrouding the summits, cloud will lift and some brighter spells developing, feeling quite warm and muggy at times although strengthening southeasterly winds will help. Cloud thickening at times and a few light showers possible. Cloud thickening during the evening.

Chance of cloud-free hill tops above 800m: 50% improving to 80%, falling later in the day to 60%.

Low cloud and visibility: Low cloud is likely to affect many of the more easterly ranges in the morning with cloud bases scattered or broken above 600m, cloud will lift and thin with many summits clearing, although persistent cloud may affect the eastern Cairngorms. Later in the day cloud may thicken again around the summits of the higher tops reducing visibility. General visibility will be good throughout the day, perhaps dipping in any showers but good views are likely across the hills.

Met Office Aberdeen Meteorologist's View
A warm day at low level and feeling muggy at times but the strengthening southeasterly winds will make it feel a little cooler.

Forecast for Friday 18 Aug 2023
Weather: Cloudy at times but some bright or sunny spells developing and mostly dry. Fresh or strong southeasterly winds may be gusty at times especially for hills in the west. Some light rain or drizzle will spread east by late evening.

Maximum wind: Southeasterly 20 mph with gusts 30-35mph.

Chance of cloud-free hill tops above 800m: 50% improving to 70%, falling in the evening to 30% as cloud and rain spread east.

Low cloud and visibility: Scattered or broken cloud in the morning above 600m will lift and clear although some eastern ranges will continue to be affected for much of the day. Cloud will thicken and lower during the evening period with some light rain affecting western ranges by late evening with poor visibility here.

Temperature: **Glens:** Plus 11 rising to 18 Celsius.
At 800m: Plus 6 rising to 12 Celsius.
Freezing level: Above all summits.
